Diamond Head Oil, N. J.

10/22/79  
MMP

Fred N. Rubel

Chief, Emergency Resp. & Insp. Br. (2-SA-ERI)

Patrick Harvey (2-FT-WF)

Chief, Water Facilities Branch

Pat, the above company has applied for a permit to discharge effluent from their oil water separator. On May 30, 1978 I was contacted by Mr. Gary Allen (FTS 477-5560) of NJDEP regarding the status of the Diamond Head NPDES application. The situation has been described to me as follows: "Diamond Head is removing from their property oil which has seeped into the ground water. Oil and water is being pumped to the oil water separator. The discharge from the separator is being spread over the Diamond Head property so that continued oil/water separation can occur."

NJDEP's Scott Maccone has requested that the processing of Diamond Head Oil's permit be expedited. I've discussed this with Phil Greco and wish to confirm our conversation by way of this memo.

cc: Scott Maccone, N.J.D.E.P.
